

Generating and Installing Spectralink Licenses

Some features of Spectralink DECT Servers, as well as adding users or support (to enable, for example, firmware updates), require the installation of a perpetual or annual license.

When the license is ordered from ALLNET.ITALIA, the **P-ID** (Product ID) of the Server for which the license is being purchased must be provided, which ALLNET.ITALIA will communicate to the manufacturer to complete the order.

The customer then receives an email containing the purchased licenses, in the form of alphanumeric strings called **APK** (Authentication Product Key).

The APK does not represent the license to be installed on the Server, but rather a sort of voucher that the customer must associate with the **ARI** (Access Rights Identity) or the **UUID** (in case of a Virtual IP Server was deployed) via the Spectralink Keygen portal, thereby obtaining the actual key to be copied and pasted onto the server.

License Generation

Make sure you have on hand:

- The ARI number of the Server for which the license is to be installed, found under **Administration > Wireless Server**
- Just in case of Virtual IP Server, you will need the UUID (visible on the Status page)
- The APK string(s) received from ALLNET.ITALIA in DOCX format

Go to <https://keygen.spectralink.com> and paste the APK string of the license to be generated.

If the string entered is correct, the license name will appear, along with the ARI/UUID and Email fields (to which a copy of the license will be sent), to be filled in with the correct information.

Email

helpdesk@[REDACTED].it

Enter your work email address to receive the generated license keycode copy. If you do not receive the email, please first check your spam or junk folder. Please make sure to add emeaom@spectralink.com as a saved contact so you can continue to receive emails from it.

Note regarding GDPR: The privacy of your information is important to us. We will only use this information you provide for support & services communications regarding the products and services requested from us. This information may be shared with members of the Spectralink group of companies, but it will not be shared for marketing purposes outside of our group. Please consult our privacy policy for further information: <http://more.spectralink.com/privacy-policy>

Submit

After selecting Submit, the license key will be displayed: pay close attention when copying it, as some characters may be on a new line.

License type: 150 Users | IP-DECT Server 6000/6500
License key: 5e21c7386a9ad136e2fb911ae414f7a466b4e149000000 [REDACTED] 000000000000
0

Repeat the process for any additional licenses to be generated.

For annual-type licenses, such as Software Assurance, validity is 365 days from the date of generation on the portal.

License Installation

Go to **Administration > Licenses** and enter the License Keys generated using the procedure described above, one at a time if there are multiple licenses, pressing Load individually for each.

Some licenses require a reboot to be applied.

License Recovery

From the same Keygen portal, it is possible to retrieve all licenses previously generated for a given ARI by clicking the Retrieve License button at the top right, or by going to this link <https://keygen.spectralink.com/get-licenses.html>

By entering an ARI, all associated licenses will be shown, so that in case of loss they can be retrieved and reinstalled; the expiration date, if applicable (for example on Software Assurance licenses), is also displayed.
